

K4 Controller

Quick Start Guide

Part Number: CA-HKCT-0004

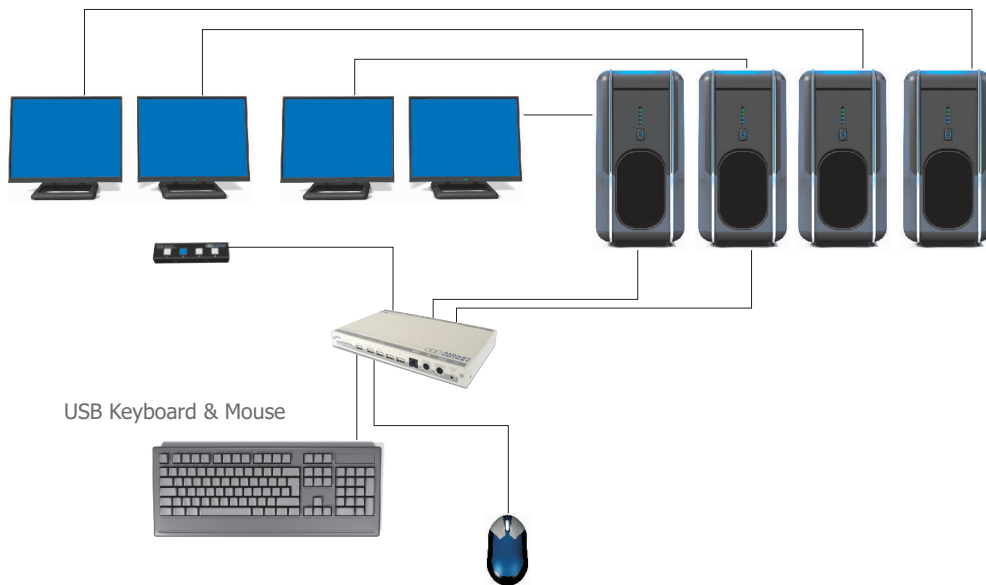

Overview

The **K4 Controller** is used to provide single key press selection on a K4u USB keyboard and mouse switch. Illuminated switches provide visual confirmation of channel selection.

The controller can be fitted to any K4u equipped with an external power supply and simplifies operation so that users no longer need to remember channel change hot-keys.

Installation is quick and easy and operation is intuitive.

K4 Controller

Connection Notes

- The K4 Controller plugs directly into the Expansion port on the K4u.
- The K4 Controller is a Plug and Play (PnP) device and as such does not require the user to set any K4u DIP switches differently if it is in use.
- The K4u will not need re-booting after the K4 Controller is plugged in.
- There are 4-channel selection buttons and it will only control up to four PCs in cascaded systems.
- The K4u must have an external power supply when used in conjunction with the K4 Controller.
